WARNING

VAI high performance sled rental is considered a very serious opportunity that is limited only to “very serious” snowmobilers. These sleds are stock and modified sleds that may approach 200HP and very quickly can reach speeds well over 100MPH. An interview with VAI staff will be needed in order to determine the renter’s capabilities of operating sleds of this high performance nature. Years of operating experience, referrals, proof of health and accident insurance, age, proof of personal sled ownership, any number of criteria may be utilized in order for VAI staff to make the decision to rent a high performance sled to a perspective renter. If you plan to rent a high performance sled, any documentation or proof of capability will help VAI in determining qualification. Feel free to bring anything with you that may help support the decision. If a rental agreement is signed, under NO circumstance can any other operator other than the renter of record operate a VAI high performance sled. The decision to enter into a high performance sled rental contract is solely the decision of VAI staff. It may be based on availability, weather, or any other variables that may or may not be based on the presumed capability or experience of a rider. Please respect the final decisions made by VAI staff and obey all the rules as set forth in this terms and conditions document.
